

Genomics Core Services

Genomics

Validate your microarray results or siRNA knockdown studies!

Services offered

- TaqMan qPCR
 - ◇ Gene expression, miRNA, SNP genotyping, low density array
- Amplifluor qPCR
 - ◇ Gene expression
- SYBR Green qPCR
 - ◇ Gene expression
- Primer and probe design
- DNA and RNA isolation
- cDNA synthesis
- Bioinformatic analysis
 - ◇ Microarray, gene regulation, molecular evolution, reverse vaccinology

Equipment available

- ABI 7700 and 7900HT platforms
 - ◇ 96 well, fast and standard qPCR
 - ◇ 384 well qPCR
 - ◇ TaqMan low density arrays

We are a full-service core. We provide reagents, normalizers, plate set-up, analysis and consultation. Customers can also set-up their own plates and run them at our core.
